13. Are there additional comments you would like to make about University Information Technology support services?

- promptly. I see no reason to keep paying for the Helpdesk when we have such wonderful support on our campus.
-
7. many times the equipment in the classrooms doesn't work. Tue, Aug 4, 2009 12:53 AM Find...
-
8. I stopped calling our local IT staff because I would not get responses after several calls and emails. Being an adjunct faculty, we have different needs than on campus staff and have no choice but to get their help....it's unfortunate that they don't find us worthy of even returning a phone call. As you can tell, I am not happy at all with whomever holds this position at AUSB. Mon, Aug 3, 2009 11:55 PM Find...
-
9. The tech support I have needed over the past year has mostly to do with immediate need to run the tech system during an instructional period. I don't use the call system because they are not present and can't help me with the problems I have had. I need the "bedside manner" of an immediate, present, support person. On occasion when there was some issue with my computer, some program I wanted to load or some application I wanted to use for the first time, I needed a person nearby to help me Mon, Aug 3, 2009 10:37 PM Find...

figure it out. I say thank you to Bryon Dean and the work study people he has in his team. They should be in charge of all of it and get paid double. Forget the long distance nonsense.

10. On the AUSB campus, our IT person, Bryon Dean, that handles EVERYTHING and coordinates everything IT related is the best I have ever seen. Mon, Aug 3, 2009 7:28 PM  [Find...](#)

11. I think it is ridiculous that we have to send requests to central it help desk instead of being able to first go to our local support person. Sometimes a request is small and our local people can fix it quickly but I am often told that the policy is I have to call the help desk or send a help ticket instead of walking down the hall and asking our guy if he can help. This causes delays in our ability to function and is not cost effective for the campus. Mon, Aug 3, 2009 6:02 PM  [Find...](#)

18. If you feel that you need more technology in the classrooms please elaborate.

electronic voting to interact with ppt.

7. I have need for more advanced software like Photoshop at times and it is not always available. Mon, Aug 3, 2009 11:59 PM Find...

8. I need the equipment to work and for me to know how to work it. I use video tapes all the time and it isn't easy to reset the machines for low tech when they are set for on line access. Sometimes the sound works and sometimes it doesn't so I have to get a tech support person almost every time I want to play a video. DVD's cant stop at random points and then start again when you want of fast forward of back to a different place on the tape so they aren't as useful a tool. I also use overheads still and am very happy to say they are still available and working.

The tech person on our campus is overworked and underpaid and there should be an award for flexibility and work around support for a person who is dedicated to student and faculty access to functional technology.

9. I work as a work study student and sometimes on weekends when no IT is available and I definitely could Mon, Aug 3, 2009 7:37 PM Find...

20. Are there additional comments you would like to make about campus facilities?

were done perfectly fine as they were. New systems take up valuable time to learn and master, just in time for the next brilliant tech shift which causes a new stroke and a new period of adjustment. I am losing time trying to navigate systems I never learned how to use effectively, and for that, just as I learn them they change again. I'm glad I have a MAC instead of a PC as they are at least somewhat intuitive. The campus facilities (phones for example) are so slow I often get my messages the next day instead of when they came in. The best thing about our tech system is that Bryon is really there to help.

6. Windows XP are better than Window Vista I think; at least they are not as slow Mon, Aug 3, 2009 7:37 PM Find...

7. Byron Dean is just great: I am no longer on campus as I am a full time intern, but he was always helpful and creative. I hope that AUSB will do their best to keep him as an employee! Mon, Aug 3, 2009 5:24 PM Find...

25. Are there additional comments you would like to make about University Information Technology services?

How does that help me serve my students? Know the best questions to ask to obtain critical thinking? or which strategies to use to best engage my students? Being excited about technology is like being excited about a pencil or a pen. It is a tool, if I can't figure out how to use it, then I go for the lower tech. When systems change there needs to be consideration for training. When there isn't enough resources for training the system should stay the way it is. Competent old isn't worse than incompetent new.

8. Smoother transitions and more on campus support would be great. Mon, Aug 3, 2009 6:07 PM Find...

9. This may not be the appropriate place for this comment, but it was incredibly frustrating to have classmates throughout my academic tenure at AUSB who were virtually computer illiterate: It held up the process constantly because the professor would have to take time to help them with presentations. At this time, students returning to graduate school should be expected to have a moderate amount of experience with computer work, i.e. researching, powerpoints, email, various browsers or academic tools.
