- Exposure controls
  Personal protective equipment:
  General protective and hygienic measures:
  The usual precautionary measures for handling chemicals should be followed.
  Keep away from foodstuffs, beverages and feed.
  Immediately remove all soiled and contaminated clothing and wash before reuse.
  Wash hands before breaks and at the end of work.
  Avoid contact with the eyes and skin.

- Breathing equipment: Not required.

- Protection of hands:
  Protective gloves
  The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.
  Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.
  Select glove material based on penetration times, rates of diffusion and degradation.

- Material of gloves
  The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.

- Penetration time of glove material
  The exact break-through time has to be determined and observed by the manufacturer of the protective gloves.

- Eye protection:
  Tightly sealed goggles
